

Dr Ioannis Sotiropoulos

ICVS Institute, School of Medicine, University of Minho, Portugal

&

ICVS/3B's - PT Government Associate Laboratory, Braga/Guimarães, Portugal

Dr Ioannis (John) Sotiropoulos is *FCT Investigador* - Group Leader at the ICVS Institute of Medical School, University of Minho in Portugal. His research work focuses on understanding the orchestrating role of environmental risk factors (e.g. chronic stress) on the onset of Alzheimer's disease (AD) with specific focus on the relationship between AD and depression, a stress-related disorder. Dr Sotiropoulos has molecular, electrophysiological and behavioral expertise on Tau protein and its involvement of pathological brain aging. He has previously trained and worked at the Max Planck Institute of Psychiatry (Germany), Columbia University (USA), RIKEN-Brain Science Institute (Japan), MRC Center for Synaptic Plasticity (UK) and Medical School of Athens (Greece). His work is published in high esteemed journals such as PNAS, EMBO J, Molecular Psychiatry, Cell Death & Diff, Aging Cell, J Neuroscience. His scientific achievements are internationally recognized in the form of prizes & awards e.g. *Hirnliga* Alzheimer Award 2009, AD/PD Young Faculty 2014 Award, Jerome Lejeune 2017 Award, Janssen Innovation Award 2017.
